

## **A window to the world: manage your risk, across the globe!**

In just a few clicks, Coface Services allowed you to check credit reports online for almost 95 countries.

Few weeks ago, we have extended our available area to Africa, Central and South America and Canada.

Closer to us, Central Europe takes more and more place in our international trade. In order to help you to better manage your risks, we propose today yet more information in our reports in Central and Eastern Europe.

**Unique coverage, exceeding 200 countries!**

We offer you 2 types of report:

● **A credit report** - providing you with details of a company's most up-to-date financial position. An immediately available view is sent to you instantaneously. (When needed, confirmed by an updated report within 5 days).

● **A compact report without financial data** - providing you with details of a company's legal and administrative position.

You will also be able to benefit from automatic monitoring in the near future. This will provide you with email warnings concerning any negative events that occur during the year following your report request.

Do you have questions? Then contact one of our specialists!
