

You can now monitor your risks on 13 new countries!

Dear customer,

Few weeks ago, we announced the availability of new reports on Central and Eastern Europe.

● 13 of them offer the possibility to monitor automatically the risks.

These countries are: Latvia, Lithuania, Estonia, Poland, Czech Republic, Slovakia, Hungary, Slovenia, Croatia, Serbia, Bulgaria, Romania and Ukraine.

● 16 criteria will be included in the follow up service:

Name, Address, Legal Form, Capital, Registry status, Shareholders, Management, Related companies, Insolvency, Maximum credit, Score, Payment behaviour, Debt collection experience, Employees, activity and annual accounts.

In order to activate a monitoring, you have to choose the option Credit report with monitoring. Each update will generate an e-mail that will describe the items that moved and a HTML file with the updated report.

The monitoring will live 12 months and is automatically renewed.
