

A window to the world: manage your risk, across the globe!

In just a few clicks, Coface Services allows you to check credit reports online for almost 220 countries.

Few weeks ago, we have extended our available services to all Central Europe and a full monitoring on 13 countries of the area.

Today, we upgrade our reports on Portugal!

The new credit report provides you with details of a company's most up-to-date financial position. The sector characteristics, the evolution of the score, the economic activities (export), the full balance sheets and cash flow statement will complete the analysis.

Do you have questions? Then contact one of our specialists!
